Recycled content for ECO-FIT Chairs:

- A majority of the weight of the ECO-FIT Line seating consists of recycled material.
- Approximately 98% of the chair materials, including the shipping carton are recyclable.
- The lowback chair weighs 48 pounds. 29 pounds (60%) of this is steel in the control mechanism, back upright, arms and pneumatic lift cylinder.
- The highback chair weighs 50 pounds. 29 pounds (58%) of this is steel in the control mechanism, back upright, arms and pneumatic lift cylinder.
- The remainder of the materials in the chairs is plywood, plastic (primarily nylon, about 20% recycled content) and fiber cushions - 100% recycled with a soy-based urethane foam topper.
- Control: NF T3004 - Tilt/Lock
- Cantilever: SPHERA D71359

Options:

- Longer gas lift.
- Urethane arm pad.

The shape of the back conforms to the "S" curve of the spine to fully support the user.

Each pillow can be independently adjusted to cradle, cushion and cup the torso. Each pillow is also vertically moveable to provide support where it is needed most.

This chart illustrates how the headrest and pillows are independently adjustable to maximize the exact comfort level and support of every individual user, regardless of height differences.
